PRODUCT DATA SHEET

ASAFA #3

Anti-Silking, Anti-Flooding Agent #3

Product #19

Applications

ASAFA #3 is a linear polydimethylsiloxane polymer designed for use where floating or silking is a problem. **ASAFA #3** is a well-balanced combination of predominately volatile compounds which effectively balance out solvents during the air dry process. Systems include: alkyds, modified alkyds, acrylics, epoxies, vinyls and most oleo-resinous non-aqueous systems.

Benefits

- Inhibits Float
- Controlled Uniformity
- Controls Flooding
- Helps Eliminate Cratering

Recommended Use Levels

4 lbs. to 9 lbs. per 100 gal. (0.5% to 2.0% of total weight). Can be post-added or added during letdown.

Typical Properties

Visc.: 15 - 18 cps

Color: Clear

Sp. Grav.: 0.888

Solvents: Aromatic 150

Wt./Gal.: 7.40 lbs./gal
