PRODUCT DATA SHEET

APACA

Anti-Pinholing, Anti-Cratering Agent

Product #21

Applications

For use in water-borne and water-reducible products, **APACA** is a modified dimethyl polysiloxane co-polymer solution. It will help in reducing surface defects by altering the surface tension of the coating.

Benefits

- Eliminates Pinholes
- Eliminates Craters
- Eliminates Orange Peel
- Meets F.D.A.; 175.300
- Increases Gloss
- Increases Slip
- Increases Mar Resistance

Recommended Additions

4 lbs. to 9lbs. per 100 gal. (0.5% to 2.0% of total weight) Add to letdown under agitation.

Typical Properties

Visc.: 16 - 20 cps

Color: Clear

Sp. Grav.: 0.91

Ionic Activity: Non-Ionic

Wt./Gal.: 7.58 lbs./gal
