PRODUCT DATA SHEET

#14 Sta-Brite

Product #22

Applications

This easily-incorporated Octadecanoic Acid product is designed to enhance leafing aluminum in enamel and related systems. Compare **#14 Sta-Brite** for appearance and stability. Improves the brightness, leafing and leaf retention of all vehicles commonly used for leafing aluminum coatings.

Benefits

- Improves Uniformity
- Longer Shelf Stability
- Minimizes Deleafing (under adverse storage conditions)
- Stir-in Quality

Recommended Additions

0.5% to 1.5% of total volume of coating. Add to letdown under agitation.

Typical Properties

Visc.: 15 - 18 cps.

Color: Clear

Sp. Grav.: 0.866

Solvents: Aromatic 150

Wt./Gal.: 7.22 lbs./gal
