PRODUCT DATA SHEET

SCABA

Sag Control and Bodying Agent

Product #23

Applications

Made for easy handling. **SCABA** is a reactive polyamide resin solution that is designed for pigmented systems: acid-catalyzed, alkyds (short, med., long oils), epoxy, epoxy ester, polyurethane and polyester.

Benefits

- Increases Viscosity *without thixotropy or puffiness*
- Improves Sag Resistance
- Immediate Viscosity Increase
- Meets F.D.A.; 175.105 & 175.300

Recommended Additions

1% to 4% of resin solids. Viscosity increase in proportion to quantity added. May be added to letdown under agitation. Above 4% may inhibit drying.

Typical Properties

Visc.: G-J (Gardner)

Color: Lt. Amber

Sp. Grav.: 0.856

Solvents: Mineral Spirits

Wt./Gal.: 7.31 lbs./gal
