PRODUCT DATA SHEET

ASASWA

Anti-Sag, Anti-Settling Wetting Agent

Product #27

Applications

ASASWA is a highly modified reactive polyamide resin solution that is designed for: acid-catalyzed, alkyds (short, med., long oils), epoxy, epoxy ester, polyurethane and high solids polyester systems.

Benefits

- Increases Sag Resistance
- Excellent Pigment Wetting
- Eliminates Hard Settling
- Enhances Color Development

Recommended Additions

3 lbs. to 7lbs. per 100 gal. (0.5% to 1.5% of total weight) for sag control (can be added or during post manufacturing). 0.5% to 2.0% of total pigment weight if used for dispersion (add during grind phase).

Typical Properties

Visc.: C-G (Gardner)
Color: Lt. Amber
Sp. Grav.: 0.89
% Active: 100%
Wt./Gal.: 7.42 lbs./gal
