PRODUCT DATA SHEET

#249 HI-TECH

Product #28

Applications

#249 HI-TECH is a carefully calculated blend of Alkyl-Aryl modified silicones designed for high solids systems to improve Mar Resistance without the standard recoat problems of common silicones. Manufactured for use in virtually all high solids solvent-borne systems

Benefits

- Improves Mar Resistance
- Easy to Incorporate
- Recoatable
- Sharpens Gloss
- Improves Flow
- Enhances Substrate Wetting

Recommended Additions

4 lbs. to 8lbs. per 100 gal. (0.5% to 1.5% of total weight). Should be added during letdown.

Typical Properties

Visc.: 15 - 20 cps

Color: Clear

Sp. Grav.: 0.895

Slvents: Aromatic 150

Wt./Gal.: 7.46 lbs./gal
