PRODUCT DATA SHEET

WREAMA

Water-Reducible Emulsion Anti-Mar Agent

Product #32

Applications

WREAMA is a solution of a polyether-modified dimethyl polysiloxane co-polymer designed for use in all water-based and water reducible alkyd resin systems.

Benefits

- Improved Mar Resistance - *Without Recoat Problems*
- Improves Slip
- Improves Flow
- Sharpens Gloss
- Easy to Incorporate

Recommended Additions

5 lbs. to 10lbs. per 100 gal. (0.5% to 2.0% of total weight). Add during letdown.

Typical Properties

Visc.: 14 - 20 cps

Color: Clear

Sp. Grav.: 0.911

Solvents: Butyl Cellosolve

Wt./Gal.: 7.59 lbs./gal
