PRODUCT DATA SHEET

AMMA

Anti-Mottling Metallic Additive

Product #38

Applications

AMMA is a polyalkyleneoxide-modified polydimethylsiloxane (non-ionic) developed for high solids / high solids metallic coatings. Systems include: acrylic resins, alkyds, epoxy, melamine, phenolic, polyamide, polyester, urea and urethane.

Benefits

- Prevents Mottling
- Color Uniformity
- Sharper Gloss
- Controls Surface Flooding and Floating
- Controls in-can Pigment Float

Recommended Use Levels

4 lbs. to 9 lbs. per 100 gal. (0.5% to 2.0% of total weight). May be used during grind or added to letdown under agitation.

Typical Properties

Visc.: 14 - 18 cps

Color: Clear

Sp. Grav.: 0.902

Solvents: Aromatic 150

Wt./Gal.: 7.52 lbs./gal
